

STEP ONE

Open Studio and import your video.

STEP TWO

Press the  to mark where you want your video to start, and the  to mark where it should end. Then click “Add Clip to Conversion Queue” and Export.

STEP THREE

Click on “Edit” on the top center of the screen. Drag your clip from the left hand window onto the timeline at the bottom center of the screen.

STEP FOUR

Click on “Export” and choose a name for your clip. Make sure all settings are exactly as shown here, except for “image size,” which should be the size in which you recorded the clip. (1080, 720, 2.7, etc.)
