

Neither B.A.S.S. nor the host organization has the right to grant permission for individuals or companies to use unmanned aerial vehicles (UAV's) for commercial purposes. Please refer to the FAA guidelines at (faa.gov/uas) to ensure you are in compliance with ALL rules and regulations.

If you or your company does comply with all FAA restrictions, we ask you to be mindful of the fact that B.A.S.S. will be using an approved drone to film for Bassmaster LIVE. If using at launch, please be sure to keep your UAV out of the shot at all times. Additionally, please inform Mandy Pascal (mpascal@bassmaster.com) the specific days and times you plan on using your officially approved UAV.

Thank you for following the above guidelines. Because of the increased use of UAV's, there is more attention on B.A.S.S., and we don't want to put our sponsors or the host in jeopardy of receiving a fine.
